

ACCESSORIES

HAND-HELD

Sepura's hand-held radios are complemented by a comprehensive portfolio of accessories. These are designed and specified by Sepura, based on our detailed understanding of the challenges faced by users worldwide on a daily basis. High quality, ease of use and meeting users' specific operational requirements are the key principles behind the Sepura range. The products featured in this datasheet represent a subset of those available.

Please contact your Sepura representative or visit sepura.com for further information.

Going further in critical communications

BATTERIES

Each battery pack carries a unique electronic serial number for traceability and warranty purposes and logs charge and discharge events for later analysis. To assist in asset tracking, the serial number, together with date information, is also presented as a 2D barcode on the label of each battery. The Sepura battery range is designed to provide solutions for a wide range of users. Utilising the latest battery technology, the range typically encompasses standard-, mid- and high-capacity packs, each of which offers excellent weight-power ratios across a range of duty cycles.

CHARGERS

PERSONAL RAPID CHARGER

The Personal Rapid Charger allows a battery connected to a radio to be charged from a mains supply operating between 110V to 263V 50/60Hz AC. The hand-held terminals manage the intelligent charging of the battery and can be operated whilst the Personal Rapid Charger is connected.

MULTI-WAY CHARGERS

Available as 1+1 and 6+6, these chargers are able to simultaneously charge a battery attached to the hand-held terminal plus a spare battery. The charger independently manages the charging process of each spare battery and clearly indicates the charging state via a dedicated multi-coloured LED.

12 WAY + 24 WAY BATTERY CHARGERS

A choice of either 12 or 24 way battery chargers. These charging units are designed to provide simultaneous re-charging of both standard and high capacity batteries thus saving time and operational costs. The battery management system is designed to ensure best capacity yield whilst maximising the number of charge cycles possible.

CAR RAPID CHARGER

The 'GSM' style charger allows the battery, fitted to the hand-held, to be charged from a vehicle's 12v DC supply. An LED indicates that power is available from the vehicle.

AUDIO ACCESSORIES

EAR HANGERS

Sepura provides a range of cost effective earhangers for the hand-held terminals, typically available with either short or long lead lengths. Remote Speaker Microphone versions are terminated with a 3.5mm mono jack.

GSM STYLE HANDS-FREE KIT

The GSM style hands-free kit consists of a separate ear piece, an in-line microphone and a Press-To-Talk (PTT) module. The PTT module is essential for making half-duplex calls.

REMOTE SPEAKER MICROPHONE (RSM)

These rugged units are typically worn on the lapel and allow the user flexibility in carrying the radio. Two models are available for use with the STP8000 and STP9000 Series (known as Basic and Advanced) and a single model for the SRH3800. All models support a mono jack socket for earhanger connection.

ANTENNAS

Extended helical and 1/4 wave whip antenna options.

CAR KIT

The car kit enables the Sepura hand-held terminals to be used hands-free in a vehicle. It connects the radio to a vehicle mounted antenna, loudspeaker, microphone and Press-To-Talk (PTT). In addition the vehicle's power is used to operate the radio and charge its battery.

CARRYING OPTIONS

CASES

A range of leather cases have been designed to accommodate both standard and high capacity batteries and allow connection of audio accessories.

THE 'KLICK FAST' CARRYING SYSTEM

Sepura has selected the 'Klick Fast' stud and dock solution. The durable stud moulding allows secure, quick, easy docking and locking of the hand-held radio into any of seven positions via the patented ratchet system.

Sepura's policy is to continually improve its products and services. This document should be used for indicative purposes only and is subject to change without notice. A range of accessories for more specialist public safety roles is also available. Please contact Sepura for more information.
